

Hairloss

Understanding the causes and therapies

Date : 18th August 2007, Saturday

Venue : Suntec Singapore International Convention & Exhibition Centre Meeting Room 301-302, Level 3

Time : 1:45pm - 4:00pm
(Walk in registrations on a first come first serve basis. Limited to 150 participants only.)

Hair loss can be caused by a variety of factors. It may result from heredity (i.e. genetic factors), aging, the stress of an illness or major surgery, local skin conditions, and systemic diseases.

This session will give you an understanding on the causes of common hair loss and its available therapies.

About the Speakers:

Dr Patricia Ng is a dermatologist whose practice includes both general and aesthetic dermatology. In addition, she also has a special interest in medical dermatology and immunodermatology. Prior to joining Dermatology Associates in 2007, she was Chief of the Immunodermatology Unit at the National Skin Centre for 5 years where she was actively involved in research and teaching dermatology trainees and general practitioners.

Dr Joyce Lee's area of interest is in hair disorders and she is currently the consultant in charge of the Hair and Nail Clinic at the National Skin Centre. She has spoken at various public forums on hair loss, given talks to general practitioners on hair disorders, and invited as speaker in international conferences on hair disorders.
